Making a difference...

Case Study One:
"Due to the trauma they had been through, the child experienced mental health challenges and they stopped attending school, they became disengaged and they were falling behind, which could have become a vicious downhill spiral. Thanks to the donated laptop the child was able to access online learning, complete their homework and engage with school from the safety of the Refuge. They could participate at their own pace and reduce the anxiety they were experiencing linked to schoolwork. This has meant that slowly the child will be able to reintegrate back into mainstream schooling." (Teenage Boy in Refuge - Nottinghamshire)

Case Study Two:
"Children within the Refuge were struggling to complete homework on mobile phones, causing frustration and stress for families. Thanks to the donated laptop, they were able to complete homework and use educational apps effectively. They gained independence navigating learning platforms and confidence completing tasks successfully. The laptop access has also supported positive family interactions, with parents encouraging and celebrating learning success." (Primary School child in Refuge – Aberdeenshire)

THE FUN & HAPPINESS CHARITY

General Feedback:
"The recipients were very excited that they can now 'can now participate in online school groups', had 'relieved the stress of not having access to their old desktop'. They could also 'search for craftmaking videos on YouTube, such as origami, and are willing to try making new things'."

"We currently support a number of children who are being homeschooled due to challenging circumstances. Having access to this device would have made a meaningful difference, giving them the tools they need to engage with their education more effectively and continue learning in a stable and supported way."

"For two teenagers currently in refuge and struggling to attend school, having access to a device has made a real difference. It gave them the chance to focus, catch up on missed schoolwork, and reconnect with their education in a way that felt manageable and supportive. In a time of instability, this opportunity helped restore a sense of routine and hope."

"We had two young girls, just 8 and 5, who arrived at the refuge with their mum. They were trying to do their school homework using only her mobile phone. It was a stark reminder of how even the simplest tasks become a challenge without access to basic resources."

Making a difference...

"Many thanks for the laptops received safely yesterday and can you pass on our appreciation to all involved."
Cogwheel Counselling

"Susan Gowling and Denise Coates (alongside others) are genuinely awesome humans, who not only do incredible work creating sustainability within tech from an environmental point of view, but at Jimmy's Cambridge we've been recipients of a number of laptops and phones that have helped both staff and residents and we are truly grateful!"
Jimmy's Cambridge

"I can confirm we have received the laptop and tablets! Huge thanks! We are so grateful! This will make a real difference!"
Cambridge Acorn Project

"All laptops have arrived safe and sounds. Thank you all for the support with this donation."
